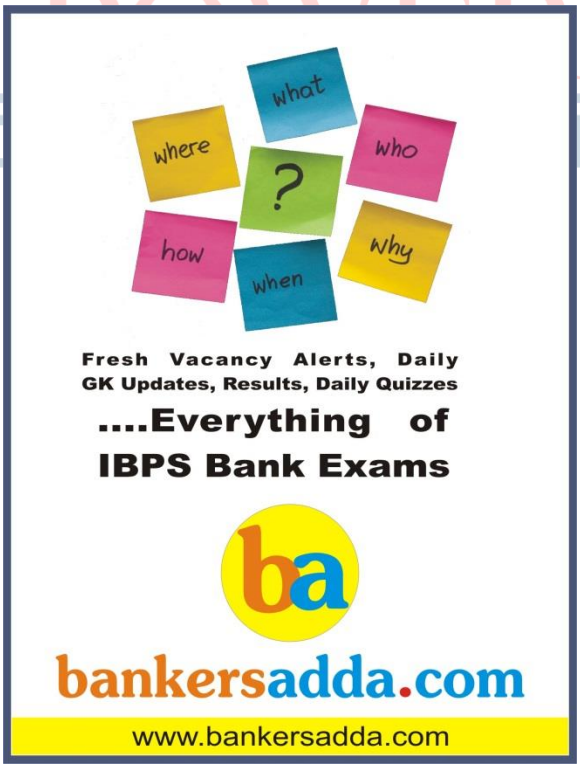
1. A peer-to-peer LAN is an appropriate network architecture for___
Home network.
2. Similar to a hub in an Ethernet network, a _____ helps relay data between wireless network nodes.
Wireless access point
3. Cell phones use _____ to access the Internet.
Micro Browser Software
4. In CSMA/CD, the computer sends a fixed unit of data called a(n)_____
Packet.
5. The uniform resource locator (URL) is case sensitive in the ___.
Directory
6. ASCII is a(n)_____
Encoding standard used to represent letters and characters.
7. A global network made up of thousands of privately owned computers and networks is called the:
Internet
8. Which of the following is NOT a basic function of the operating system?
(1) Manage memory
(2) Provide the word processing system
(3) Start the computer
(4) Provide the user interface
9. Which of the following scrambles a message by applying a secret code?
Encryption
10. The Internet began with the development of
ARPANET
11. Website is a collection of _____
1) HTML documents
2) Graphic files
3) Audio and Video files
4) All of the above
12. Who designed the first electronic computer - ENIAC?
Van Neuman
13. Which of the following is not a network?
1) Local Area Network
2) Wide Area Network
3) Optical Fiber
14. In MICR, C stands for?
Character
15. Which of the following is the largest unit of storage?
TB
16. Virtual memory is?
Memory on the hard disk that the CPU uses an extended RAM
17. ___ is the process of finding errors in software code?
Testing
18. What is the shortcut key to "Undo" the last action in a document?
Ctrl + U
19. The programs which are as permanent as hardware and stored in ROM is known as
Firmware
20. For creating a document, you use..... Command at File Menu.
New



21. Computer uses the _____number system to store data and perform calculations.
Binary
22. ..... is the process of carrying out commands
Executing
23. In word, when you indent a paragraph, you ....

Push the text in with respect to the margin

24. ASCII stands for .....
American Standard Code for Information Interchange
25. Which of the following is used by the browser to connect to the location of the Internet resources ?
URL
26. …….is the process of dividing the disk into tracks and sectors.
Formatting
27. What is the permanent memory built into your computer called ?
ROM
28. Which computer memory is used for storing programs and data currently being processed by the CPU ?
Internal memory
29. Changing an existing document is called ____ the document.
Editing
30. What is backup?
Protecting data by copying it from the original source to a different destination
31. What is a popular program for creating documents that can be read on both a PC and a Macintosh computer?
Adobe Acrobat
32. An image on a computer screen is made up of a matrix of what?
Pixels
33. What does dots per inch (DPI) measure?
density of the pixels on a computer screen
34. What type of software creates a smaller file that is faster to transfer over the Internet?
Compression
35. A unit of computer information that contains data as well as all the procedures or operations is called:
An object.
36. The world's first truly cross-platform programming language is called:
Java.
37. The most widely used type of database management system is the:
Relational database.
38. What is the newest type of database, which is well suited for multimedia applications, called?
Object-oriented database
39. What do the circles on a data flow diagram represent?
Transformation processes
40. The type of printer that prints by selectively unchanging static electricity from spots on a metal drum is a(n):
Laser printer
41. A warm boot in older versions of Windows is caused by:
Typing the Ctrl+ Alt+ Delete key combination
42. Setting fonts for the text in your document is an example of:
Formatting.
43. _____ is the file system used by the operating system to identify the physical locations of files on the hard drive.
FAT
44. _____software allows the user to speak into the computer rather than type in text.
Speech recognition
45. A server uses _____applications software to support its client computers.
back-end
46. What does the XP stand for in Windows XP?
Experience
47. Which symbol is used in Excel to denote exponential numbers?
^
48. Which of the following is NOT a source of viruses?
(1) Diskettes
(2) The Internet
(3) E-mail messages
(4) Computer networks
49. Which printer type is an impact printer?
Dot-matrix printers
50. What type of software must to be used to translate scanned text into a format that can be manipulated?
OCR
51. ―High Resolution‖ computer monitors will have____
High dpi
52. A world wide web contains web pages _____
Residing in many computers linked together using HTML
53. Word processing, spreadsheet, and photo-editing are examples of_____
Application software
54. Retail employees typically use _____ terminals to process sales transactions.
point of sale
55. The primary purpose of a computer is to process _____ and convert it into information.
Data
56. The simultaneous processing of two or more programs by multiple processors is ____

multiprocessing

57. Help Menu is available at which button?
Start
58. The…….folder retains copies of messages that you have started but are not yet ready to send.
Drafts
59. Which of the following statements is true?
Microsoft Windows defines the operating environment standard for computers with Intel processors
60. The _____ records the name and exact location of every file on a disk.
File allocation table
61. Inheritance is the ability of an object to pass on its characteristics to its _____.
Subclasses
62. Which of the following activities is NOT a component of e-business?
Cash flow management
63. Which of the following extends data across networks rather than store it in one central site?.
Distributed database
64. What is a serial port that adds a direct connection to a network?
NIC
65. Which of the following is saved to noncontiguous clusters on a hard disk?
Fragmented file
66. What should be used if a company wants to include its company name and logo at the bottom of every page of a brochure?
Footer
67. _____ is an event-driven programming language developed in the early 1990.
VB
68. Linux is a____
Real-time operating system
69. The_____ runs the front-end applications software in a network.
Client
70. Which of the following is used for close a tab on a browser?
(1) Ctrl + T
(2) Ctrl + W
(3) Ctrl + A for select all
71. What is RISC?
Microprocessor
72. 'NORTON'' is an ___
Anti-Virus Program
73. A program that converts high level language to machine Language is _____
Compiler
74. Zip is a -----file.
Compressed File
75. At a time how many operating system can be at work on a computer ?
Only one
76. Answer Sheets in bank PO's/Clerk's examinations are checked by using –
Optical Mark Reader
77. Image can be sent over telephone lines by using ---
Fax
78. Which among the following is a Scientific Computer Language?
FORTRAN
79. What is —Oracle|| ?
Database Software
80. IC Chip is made of -----.
Silicon
81. At which place is India's Silicon Valley situated?
Bangalore
82. A connection from one HTML document to another HTML document is called
Hyper Link
83. This device is used to connect your computer with a telephone line, so that can access information from other servers and ordinary users too, said device is called _____
Modem
84. Device on one network can communicate with devices on another network via_____
Gateway
85. The screen background is known as the_____
Desktop
86. Which of the following is not an input device?
(1) Mouse
(2) Keyboard
(3) Light pen
(4) VDU
87. What are the units used to count the speed of a printer ?
DPI
88. A computer that combines the characteristic of analog and digital computers_____
Hybrid Computer
89. WORM stands for?
Write Once Read Memory
90. Memory unit is a part of _____
Central Processing Unit
91. Which of the following companies developed MS Office-2000?
Microsoft
92. What is the meaning of _MICR'?
Magnetic Ink Character Recognition
93. VIRUS stands for_____
Vital Information Resource Under Seize

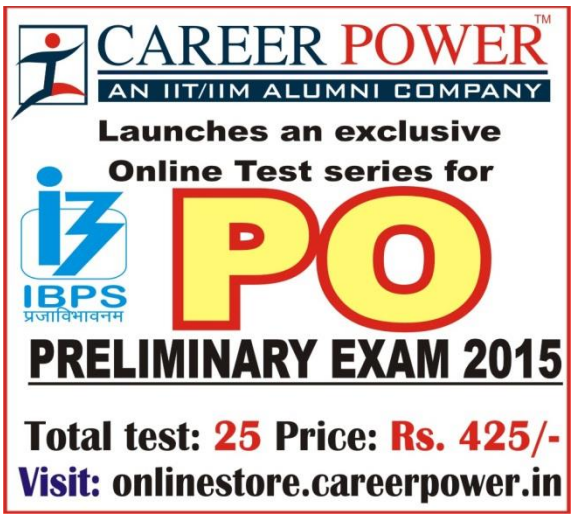
94. The technique that extends storage capacities of main memory beyond the actual size of the main memory is called _____
Virtual storage
95. _____Command we can use to close the windows.
Alt+F4
96. Algorithm is used -------
To describe a set of procedure by given result is obtained
97. FOXPRO is a ---------
Language

CAREER POWER™
AN IIT/IIM ALUMNI COMPANY

98. Who is considered to the father of computers?
Charles Babbage
99. Which of the following will connect you to the Internet?
An Internet service provider
100. What software allows you to view internet sites?
A browser
101. When more than one window is open, to switch to the next window — is the key combination.
(1) CTRL+F5
(2) CTRL+F6
(3) CTRL+F7
(4) CTRL+F8
102. Where are data and program stored when the processor uses them ?
Main memory
103. _____Represents raw facts, where- as.....is a meaningful data.
Data, information
104. Saving is a process-
To copy the document from memory to storage medium
105. PNG stands for_____
Portable Network Graphics
106. The maximum Zoom percentage in MS PowerPoint is_____
400%
107. The word 'FTP' stands for_____
File Transfer Protocol
108. Compiler in computer system is a_____
Process
109. What is an intersection of a row and column in a spreadsheet?
Cell
110. What is the process of creating movement from still images?
Animation
111. A set of rules for creating markup languages that enables programming to capture specific types of data by creating their own elements is called_____
XML
112. Small plain text files that are written to your computer's hard disk by many of the Web sites you visit are called_____
Cookies
113. Which of the following is the proper way to denote a cell in a spreadsheet?
C5
114. Which broadband service is the most available?
Satellite
115. _____ is a set of rules computers use to talk to each other.
Protocol
116. Which backup method only backs up files that have been modified since the last backup?
Incremental backup
117. Which type of transmission media is known as regular telephone wire?
Twisted-pair wire
To protect a computer from unauthorized access
119. A disk's content that is recorded at the time of manufacture and that cannot be changed or erased by the user is_____
Read-only
120. In word, you can change Page Margins by .....
Clicking the right mouse button on the Ruler
121. Which part of the computer helps to store information?
Disk - drive
122. Which key is used to delete one character to the left of the current position of the cursor ?
Backspace
123. If you want to connect to your own computer through the Internet from another location, you can use–
Telnet
124. A (n) .....is a special visual and audio effect applied in Power-point to text or content.
Animation
125. Where does most data go first with in a computer memory hierarchy?
RAM
126. All of the following are examples of storage devices EXCEPT _____
Printers
127. Select the Odd one____
Operating system
128. Which of the following is not an advantage of magnetic disk storage?

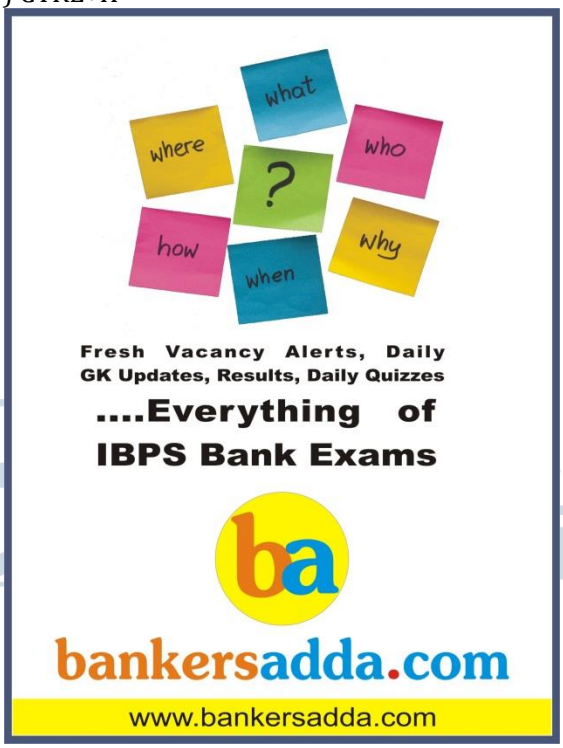
(1) The access time of magnetic disk is much less than that of magnetic tape
(2) Disk storage is longer lasting than magnetic tape
(3) Disk storage is less expensive than tape storage
(4) All of the above
(5) None of these

129. Perforated paper used as input or output media is known as____
Paper tape
130. The first generation computer system used_____
Vacuum tubes
131. To access properties of an object, the mouse technique to use is _____
right-clicking
132. The ALU and Control Unit jointly known as_____
CPU
133. Computers process data into information by working exclusively with _____
characters
134. COBOL stands for _____
Common Business Oriented Language
135. What is the other name for programmed chip?
ROM
136. _____ Store data temporarily and pass it on as directed by the control unit.
Register
137. RAID stands for_____
Redundant Array of Inexpensive Disks
138. Select the smallest memory size:-
Kilobyte
139. In most Microsoft programs, what does 'alt+f4' do?
Ends the program
140. A device that is used to transmit data from one location to another is known as
Carrier
141. Programs developed by an outside supplier and provided to the user in a machine readable form is known as_____.
Canned programs
142. Which of the following describe one or more characteristics of a modem computer?
An electronic device
143. Octal number system has a base _____.
Eight
144. PL 1 (Programming Language One) Is _____.
High level programming language
145. Which of the following is a disadvantage of machine language?
Machine Dependent
146. Android Operating system is an example of which kind of Source Model?
Open Source



147. You can use the tab key to_____.
Indent a paragraph
148. Which process checks to ensure the components of the computer and operating are connected properly?
Booting
149. What is the correct association between a hardware component and a computer function?
Mouse > input
150. The sharing of a medium and its path by 2 or more devices is called _____.
Multiplexing
151. The server on the internet is also known as _____.
Host
152. A database management system (DBMS) is a_____.
Software system used to create, maintain and provide controlled access to a database.
ike us on- https://www.facebook.com/Emahendras
153. Which of the following is an example of connectivity?
Internet
154. What menu is selected to cut, copy and paste?
Edit
155. To save a document in different location use _____.
Save as
156. Programming language built into user programs such as Word and Excel are known as _____.
visual programming languages
157. Codes consisting of lines of varying widths or lengths that are computer-readable are known as_____.
a bar code
158. To reload a Web page, press the _____ button.
Refresh

159. Personal computers can be connected together to form a_____.
network
160. Which of the following is true?
Eight-digit binary number is called a byte
161. Which of the following can be used to select the entire document?
(1) CTRL+A
(2) ALT+F5
(3) SHIFT+A
(4) CTRL+K
(5) CTRL+H



162. A concentric circle on a disk is called a_____
track
163. DSL is an example of a(n) _____ connection.
broadband
164. Instructions and data that are processed by the CPU are located in_____
RAM
165. All of the following are considered to be storage devices EXCEPT_____
CPU
166. The commonly used UNIX commands like date, ls, cat etc. are stored in_____
bin directory
167. A circuit with about 100 transistors fabricated on a single chip is called ____
MSI
168. One megabyte equals approximately _____
1 million bytes
169. A computer checks the ____ of user names and passwords for a match before granting access.
Data base
170. Computers that are portable and convenient for users who travel are known as
Lap tops
171. What is the term for unsolicited e-mail?
Spam
172. The ____ tells the computer how to use its components.
Operating system
173. When sending an e-mail, the ____ line describes the contents of the message.
Subject
174. The ____ key will launch the start buttons.
Windows
175. What is the ultimate purpose of Defragmentation?
Create More Free Space
176. Which input device cannot be used to work in MS Office?
Joy stick
177. ..... Is a method in which multiple communication devices are connected to one another efficiently.
Switching
178. ..... is a collection of web - pages and ..... is the very first page that we see on opening of a website.
Website, Home page
179. What's considered the 'backbone' of the World Wide Web?
HTTP
180. SMTP stands for _____
Simple Mail Transfer Protocol
181. Small application programs that run on a Web page and provide animation are known as _____
flash
182. The errors that can be pointed out by the compiler known as _____.
Syntax errors
183. A _____ contains specific rules and words that express the logical steps of an algorithm?
syntax
184. A Proxy server is used for which of the following?
To process client requests for web pages
185. Storage that retains its data after the power is turned off is referred to as?
non-volatile storage
186. Which term identifies main page of the entire site?
URL
187. A hard copy of a document is_____
printed on the printer
188. Which is the part of a computer that one can touch and feel?

Hardware

189. CPU stands for _____
central processing unit
190. Start or restart the computer known as _____
boot
191. This is not a function category in Excel _____
Logical
192. The operating system that is self-contained in a device and resident in the ROM is
Embedded Operating System
193. To be able to 'boot', the computer must have a(n) .....
Operating System
194. On-line real time systems become popular in.....Generation.
Third Generation
195. _____is the ability of a device to "jump" directly to the requested data.
Random access
196. ..... is the combination of keys to switch between the last four places that you have edited.
(1) ALT + CTRL + Z
(2) ALT + CTRL + Y
(3) ALT + TAB + Z
(4) ALT + SHIFT + Z
197. ..... is the functional key to display save-as box.
(1) F5
(2) F6
(3) F9
(4) F12
198. Accessing data on tapes is much ..... than that accessing data on disks.
Slower
199. Who amongst the following is called the father of modern computing?
Charles Babbage
200. If you begin typing an entry into a cell and then realize that you don't want your entry placed into a cell, you
(1) Press the Erase key
(2) Press esc
(3) Press the Enter button
(4) Press the Edit Formula button
201. Superscript, subscript, outline, emboss, engrave are known as _____
font effects
202. What is object of UPS?
(3) Provides backup power
203. Documents converted to ..... can be published to the Web.
HTML
204. Holding the mouse button down while moving an object or text is known as ___
Dragging
205. When was the first Windows operating system launched?
1985
206. What is the difference between a CD-ROM and a CD-RW?
A CD-RW can be written to, but a CD-ROM can only be read from
207. What happens when we try to delete the fries on the floppy ?
The files get deleted and cannot be restored again
208. An educational institution would generally have the following in its domain name
(1) .org
(2) .edu
(3) .inst
(4) .com
(5) .sch
209. POST stands for .....
Power on Self-Test
210. Which of the following can input graphical images and pictures for a computer?
Scanner
211. Which of the following categories would include a keyboard ?
Input Device
212. In Word you can force a page break–
By positioning your cursor at the appropriate place and pressing Ctrl +Enter
213. LSTs (Large Integration) used in?
Fourth generation
214. The purpose of an application program is to?
Meet specific user needs
215. Hypertext is a _____
A system of managing textual Information by creating associations between different documents
216. For running WINDOW minimum disk free space required is?
8 MB
217. Which of the following printers generates character from a grid?
Dot matrix
218. Accumulator is a _____
Register
219. _____Function key refreshes the current window.
F5
220. In 1983, this person was the first to offer a definition of the term 'computer virus'?
Frederick Cohen
221. To minimize all open windows and display the desktop?

Windows logo +D

222. In MS-Word 'alt + shift + d' does what?
Automatically inserts the date
223. _____ deletes an item immediately without placing it in the recycle bin.
Shift +delete
224. Which of the following is not a network topology?
Linear
225. A list of rules for transferring data over a network is called?
Protocol
226. A table consists of_____
Rows and columns
227. What does 'ctrl +esc' do?
Shows the start menu
228. A proxy server is used as the computer?
Access user permissions
229. Which of the following best defines embedded system?
A computer and software system that controls a machine
230. To see the document before the printout is taken, use.....
Print Preview
231. Digital video consists of a series of____
Frames
232. The _____ is the smallest meaningful unit of data.
Field

CAREER POWER™
AN IIT/IIM ALUMNI COMPANY

233. What are the four main aspects of data handling with a computer?
Input, processing, output, and storage
234. Most cash registers are now computers that are known as _____terminals.
POS
235. Which of the following is NOT an example of system maintenance?
Replacing user interfaces
236. Which of the following is the primary task of a NAS server?
File sharing
237. If you change Windows 98 to Windows XP, you are actually performing .....
upgrade
238. To make a copy of the current document to disk.....
Use the 'save as' command
239. The main system board of a computer is called the.....
Motherboard
240. Your position in the text is shown by a .....
Cursor
241. How many megabytes make a gigabyte ?
1024
242. Using output devices one can .....
view or print data
243. Which contents are lost when the computer turns off ?
Memory
244. When you save to this, your data will remain intact even when the computer is turned off–
Secondary storage device
245. A central computer that holds collections of data and programs for many PCs, workstations, and other computers
server
246. The piece of hardware that converts your computer's digital signal to an analog signal that can travel over telephone lines is called a–
modem
247. When the pointer is positioned on a.....it is shaped like a hand.
hyperlink
248. Mobile Commerce is best described as–
Buying and selling goods/services through wireless handheld devices
249. Which of the following is a storage device that uses rigid, permanently installed magnetic disks to store data/information–
hard disk
250. Which of the following are advantages of CD-ROM as a storage media?
All of the above
251. A device, which is not connected to CPU, is called as .....
Off-line device
252. A computer program that converts an entire program into machine language at one time is called a/ an ___
compiler
253. What is MS Word?
Word Processing Software
254. For Scientific work the most popular language is?
FORTRON
255. TCP stands for _____
Transmission control protocol
256. The first graphical web browser are?
Mosaic
257. Total memory of system can be known using?
MEM commands

258. The meaning of double-click is?
Pushing and releasing the main mouse button twice in rapid succession when the on-tree mouse pointer is positioned over the desired item
259. The term overflow means?
An excess of Internal storage
260. The access time refers to
Time required locating and retrieving stored data
261. Rotational delay time is also known as
Latency
262. Which memory is non-volatile and may be written only once?
PROM
263. Peer-to-peer is a description–
All of the above
264. Pascal is
All of the above
265. Technique to implement virtual memory where memory is divided into units of fixed size memory is–
Paging
266. An adder where all the bits of the two operands are added simultaneously–
Parallel adder
267. The point at which the flow of text in a document moves to the top of a new page–
Page break

268. Multiprocessor is a computer system–
Where many CPU under a common control
269. Non-document files are–
Non ASCII files that can be listed for any word processing software
270. Which of the Following is not a non-impact printer?
Laser printer
271. EDVAC stands for_____
Electronic Discrete Variable Automatic Computer
272. When a file is saved for the first time-_____
It must be given a name to identify it
273. The computers which are relatively rare because of their cost and size are:
Super Computers
274. A mistake in an algorithm that causes incorrect results is called a .....
Logical error
275. A(n) program is one that is ready to run and does not need to be altered in any way.
Executable
276. A set of step-by-step procedures for accomplishing a task is known as a(n)—
Algorithm
277. The main directory of a disk is called the.....directory.
Root
278. A.....is a collection of data that is stored electronically as a series of records in a table.
Database
279. As you create documents, graphs and pictures your computer holds the data in—
Memory
280. All are included in removable media except the following—
High disk drive
281. .....processing is used when a large mail-order company accumulates orders and processes them together in one large set.
Batch
282. Computer programs are written in a high-level programming language; however, the human readable version of a program is called—
Source code
283. What happens if you press Ctrl + Shift + F8?
It activates the rectangular selection
284. Which of the following is not valid version of MS Office?
Office Vista
285. What is the short cut key to open the Open dialog box in ms word?
Ctrl + F12
286. How can you disable extended selection mode?
Press Esc to disable
287. Auto Calculate will quickly add selected cells if you.....
click the Auto Calculate button on the toolbar
288. You can add a hyperlink to your worksheet by pressing
Ctrl + K

289. _____are 'attempts by individuals to obtain confidential information from you by falsifying their identity.
Phishing
290. Which of the following is the fastest type of computer?
Supercomputer
291. Which of the following is not a term pertaining to the Internet?
Keyboard
292. The operating system that is self-contained in a device and resident in the ROM is
Embedded Operating System
293. The computer abbreviation KB usually means–
Kilo Byte
294. ..... is the key to close a selected drop - down list; cancel a command and close a dialog box.
ESC
295. Which of the following is NOT one of the four major data processing functions of a computer?
Analyzing the data or information
296. The CPU and memory are located on the :
Motherboard
297. A ..... is an additional set of commands that the computer displays after you make a selection from the main menu
Dialog box
298. A letter, memo, proposal or other file that is created using Microsoft Word is called as?
Document
299. Which of the following are parts of the CPU?
Control unit
300. Which is not the portable computer?
Series Computes
301. The ROM chip which can be rewritten several times and requires the action of ultraviolet radiations to erase its contents is_____
EPROM
302. FPI stands for___
Frames per inch
303. A terabyte comprises
1024 gigabyte
304. The memory which is utmost accessible to the processor is____
Cache memory
305. In which kind of disk does the read/write head physically touches the surface?
Floppy Disk
306. What is the correct syntax for typing a function into a cell?
Equal sign, Function Name, Matching brackets
307. If you see a small red triangle in the top right corner of a cell, it means there is something attached to the call. What is it?
A comment
308. Cache memory is–
Smaller and faster than main storage
309. The overall design, construction, organization and interconnecting of the various components of a computer system is referred as–
Computer Architecture
310. BIOS are responsible for
Handling the particulars of input/output operations
311. BISYNC is an abbreviation for–
Binary synchronous
312. A process of trying out a new product by independent users before it is finally manufactured/developed–
Beta Test
313. An E-mail protocol for storage, management and change, especially in corporate offices–
Message handling service
314. Password is–
Code by which a user gains access to a computer system
315. The technique where digital signals are converted to its analog form for transmission over an analog facility is called–
Modulation
316. Narrowband channel is a communication channels–
That handles low volumes of data
317. MIME is an acronym for ....
Multipurpose Internet Mail Extension
318. The..... Settings are automatic and standard.
Default
319. Pop-ups are a form of _____on the World Wide Web?
Online Advertising
320. Which of the following is true about Operating System?
(1) It is an interface between user and the computer.
(2) It manages all resources
(3) It does all Memory management and Process management tasks
(4) All are true
321. All formula in Excel start with:
=
322. Which of the following displays the contents of the active cell?
Formula bar
323. Tab scrolling buttons

Allow you to view additional sheet tabs

324. What is the keyboard shortcut for creating a chart from the selected cells?
F11
325. You cannot close MS Word application by
From File menu choose Close submenu
326. Which file starts MS Word?
winword.exe
327. Where can you find the horizontal split bar on MS Word screen?
On the top of vertical scroll bar
328. One of the functions of the arithmetic logic unit is to:
receive data from the registers
329. What is defined as the number of bits that the CPU processes as a unit?
A computer word
330. _____ Systems use a light beam to scan input data and convert it into electrical signals, which are sent to the computer for processing.
Optical recognition
331. _____ Devices accept the spoken word through a microphone and convert it into binary code that can be understood by the computer.
Speech recognition
332. Name the technique of processing transactions in random order.
Transaction processing
333. _____ Means that a transaction is processed fast enough for the result to come back and be acted upon right away.
Real-time processing
334. _____ uses an area of memory to temporarily store data from disk that the program might need soon.
Disk caching
335. What is a device that prevents electrical problems from affecting computer data files?
A surge protector
336. What is any text that can be keyed in, such as a memo?
A text document
337. What type of program lets you produce professional-looking documents containing both text and graphics?
A desktop publisher
338. The letter and number of the intersecting column and row is the:
Cell address
339. What is the standard query language supported by most DBMSs?
Structured Query Language (SQL)
340. Which of the following are three fundamental characteristics that make a computer useful?
Speed, reliability, and storage capability
341. Which of the following is an appropriate use of groupware?
A team project
342. Software used for database management can store data, update it, _____ it, retrieve it, report it, and print it.
manipulate
343. Which of the following is NOT a function of an operating system?
Formatting a word document

CAREER POWER™
AN IIT/IIM ALUMNI COMPANY

344. Which of the following helps describe the Windows .NET Server?
It is designed for different levels of network complexity.
345. The process of analyzing large data sets in search of new, previously undiscovered relationships is known as:
data mining
346. The focus of the first phase of the systems development life cycle is to:
Identify problems and opportunities
347. Which of the following is a network in which computers are located physically close together, often in the same building?
LAN
348. What is a modulator/demodulator that is connected to a circuit board or motherboard?
Internal modem
349. What kind of server converts IP addresses to domain names?
DNS
350. In the OSI model, the actual transmission of data is handled in the _____ layer.
physical
351. Which of the following is NOT true about laptop computers?
They cannot be connected to a PC.
352. On a CD-RW you can
read, write and rewrite information
353. In computer terminology, information means
Data in more useful
354. After a picture has been taken with a digital camera and processed appropriately, the actual print of the picture is considered
output
355. What is output?

What the processor gives to the user

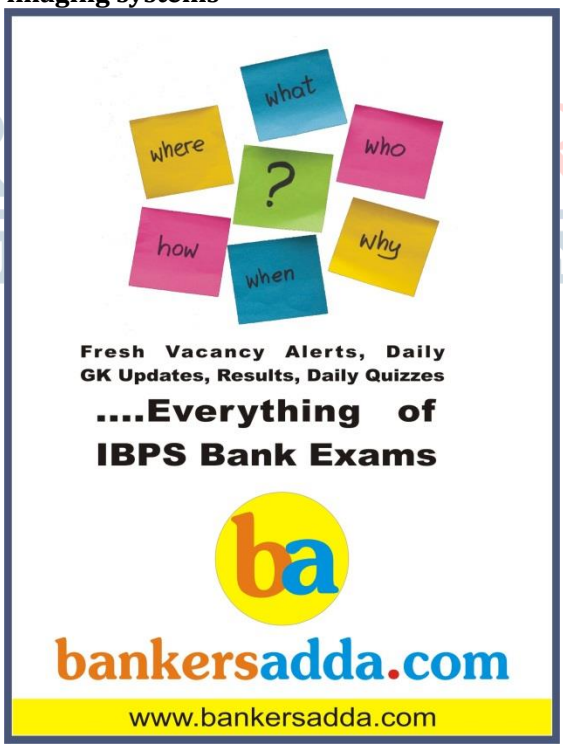
356. What is the main difference between a mainframe and a super computer ?
Supercomputers are focused to execute few programs as fast as possible while mainframe uses its power to execute as many programs concurrently
357. Programs such as Mozilla Firefox that serve as navigable windows into the Web are called .....
Web browsers
358. What is the function of Recycle Bin?
Store deleted file
359. Which device cannot be shared in network ?
Keyword
360. A right click on the desktop itself will.....
open the Display Properties dialog box
361. The advantage of using a spreadsheet is:
(1) Calculations can be done automatically.
(2) Changing data automatically updates calculations
(3) more flexibility
(4) all of the above
362. Documentations should include
(1) Destination and users of the output data
(2) Source of input data
(3) Information on the purpose of the workbook
(4) All of above
363. To edit the selected cell in ms excel-
Press F2
364. You can convert existing Excel worksheet data and charts to HTML document by using the
Internet Assistant Wizard
365. Which of the following is graphics solution for Word Processors?
Clipart
366. You can detect spelling and grammar errors by-
Press F7
367. What is the shortcut key to Indent the paragraph in ms word?
(1) Ctrl + M
(2) Ctrl + P
(3) Shift + M
(4) Ctrl + I
(5) None of these
368. Which of the following storage media provides sequential access only ?
Magnetic tape
369. What is the storage area for e-mail messages called?
A mailbox
370. The set of parallel electrical conducting lines through which different components on the mother board of a PC unit are linked together are called:
Buses
371. A PDA's memory contents remain intact when it is turned off because:
A battery keeps current available for RAM
372. A network of geographically distant computers and terminals is called a-
Wide area network (WAN)
373. One byte represents:
Eight bits
374. Saving files in HTML format:
Makes it possible for anyone to view the file in a Web browser
375. Which of the following would NOT be performed with application software?
Hard disk cleanup
376. Which of the following statements is TRUE about the public switched telephone network (PSTN)?
PSTN is comprised of a variety of physical media, including twisted pair and fiber optic cable
377. Which of the following best describes the difference between the Internet and the World Wide Web?
The Internet is the physical network of global computers, while the World Wide Web is many hypertext documents distributed globally over many computers
378. Which of the following runs on a user's local computer and is used to request and display Web pages?
Web browser
379. Which of the following computer types is most powerful?
Professional workstation
380. Which of the following is the most frequently used input device?
Mouse
381. A modem is necessary if you want to-
Connect to other computers or to the Internet using phone line, cable, or wireless connections.
382. MS Excel is a?
Window based spreadsheet package
383. What is the flow of data between countries commonly called?
Trans border data flow
384. Which of the following is NOT a purpose of antivirus programs?
Copy the name of the virus and send it to Microsoft for inspection
385. <H1> is an example of ____.

HTML

386. Which type of network requires HPNA adapters for communication between network nodes?
Phone line
387. To analyze vast quantities of scientific data and display underlying patterns, you would use a:
Supercomputer
388. The free, open-source operating system that is becoming popular is:
Linux
389. What term is used to describe software that monitors your online computer activities?
Spyware
390. Which of the following is a memory management technique that makes the random access memory appear larger than it is?
Virtual memory
391. The two major components of system software are:
The operating system and system utilities
392. Which of the following may be necessary for you to do after you install new application software?
Do a warm boot
393. The power-on self-test----------
Verifies that the computer hardware is working properly
394. Input, processing, output, and storage are collectively referred to as:
The information processing cycle
395. Which of the following is NOT part of the motherboard?
Connector
396. An example of a wireless medium that sends data through the air or space is:
Microwaves.
397. To reverse the effect of your last action in word ----
Use the Undo command
398. Information that comes from an external source and fed into computer software is called .....
Input
399. The basic unit of a worksheet into which you enter data in Excel is called a–
Cell
400. All of the following are examples of real security and privacy risks EXCEPT
Spam
401. Which of the following is not an example of hardware?
Interpreter
402. In Excel, this is a prerecorded formula that provides a shortcut for complex calculations.....
Function
403. The process of trading goods over the Internet is known as .....
e-commerce
404. A device that connects to a network without the use of cables is said to be–
Free
405. Which of the following is a circuit that issue signals at regular intervals...?
Clock
406. A set of related programs are known as----------
Package
407. The 0 and 1 in the binary numbering system are called binary digits or ....
Bits
408. The 7-bit ASCII code widely used
For data communication work
409. A hard copy would be prepared on a
(1) Line printer
(2) Dot matrix printer
(3) Type writer terminal
(4) Plotter
(5) All of the above
410. Which of the following animations cannot be done in PowerPoint?
table, revealed row by row
411. Several views are available in MS Front Page. Which one of the following is NOT a valid view ?
Web Server View
412. One of the components of central processing unit (CPU) of the computer that performs mathematical and logical operations is ...
ALU (arithmetic logical unit)

413. ..... is the key we use to run the selected command.
ENTER
414. To name a constant, you use the _____dialog box.
Define name

415. When you insert an Excel file into a Word document, the data are
Placed in a word table
416. A function inside another function is called a ….. Function.
Nested
417. Selects the entire Row press-------
Shift + Space
418. In Assembly language....
(1) Mnemonics are used to code operations
(2) Alphanumeric symbols are used for addresses
(3) Language lies between high-level language and machine language
(4) All of the above
419. CPU capacity can be measured in
MHz
420. "Zipping" a fie means
Compressing the message
421. A ..... shares hardware, software, and data among authorized users.
network
422. To produce a high - quality graphics (hardcopy) in color, you would want to use a
Plotter
423. When was the first Windows operating system launched?
1985
424. Thesaurus tool in MS Word is used for-
Synonyms and Antonyms words
425. What is the smallest and largest font size available in Font Size tool on formatting toolbar?
8 and 72
426. Aligns the selected text or line to justify the screen press-------
Ctrl + J
427. Which of the following is different from other ?
Internet
428. When data changes in multiple lists and all lists are not updated, this causes?
data inconsistency
429. Granting an outside organization access to internet web pages is often implemented using a(n)?
extranet
430. Loading Operating System onto RAM is called?
Booting
431. The purpose of the primary key in a database is to :
provide a map of the data
432. Using Windows Explorer, a plus (+) sign in front of a folder indicates—
the folder contains subfolders.
433. All of the following statements concerning windows are true EXCEPT—
windows are an example of a command-driven environment.
434. The memory resident portion of the operating system is called the—
Kernel.
435. The basic input/output system (BIOS) is stored in:
ROM.
436. Which of the following is not a tower?
Peripheral
437. The horizontal and vertical lines on a worksheet are called—
gridlines
438. What is usually used for displaying information at public places ?
Touch Screen Kiosks
439. Which key is used in combination with another key to perform a specific task ?
Control
440. Fax machines and imaging systems are examples of—
imaging systems



441. What is MP3?
A Sound format
442. _____ is a process that permits multiple computers to use the same IP address and hide their actual IP addresses from the Internet.
Network address translation (NAT)
443. What characteristic of read-only memory (ROM) makes it useful ?
Data in ROM is nonvolatile, that is, it remains there even without electrical power.

444. Data representation is based on the.....number system, which uses two numbers to represent all data.
Binary
445. To what temporary area can you store text and other data, and later paste them to another location?
The clipboard
446. Classes, instances, and methods are characteristics of:
Object-oriented design
447. Which of the following correctly describes the CD-R and DVD-R discs?
You may record data to the disc surface once and then may only read its contents
448. To move down a page in a document .....
Scroll
449. CD-ROM stands for.....
CD-read only memory
450. Use this when you want to make all letters capital without having to use the shift key for each character.....
caps lock key
451. ----------is a program that has been physically etched onto a chip.
Firmware
452. The type of memory that must have a constant power supply is:
SDRAM.
453. What type of e-commerce is being used when a student buys a computer from Dell.com?
B2C
454. __ is the basic language of web page writing.
Hypertext markup language
455. The topology where all the nodes are attached in a circular wiring arrangement is called a:
Ring topology
456. Hard disk performance can be improved by using a(n):
Disk cache.
457. Which is NOT a characteristic of a system unit?
Represents data as binary numbers
458. Where are the Editing group and the Replace command found?
On the Home tab
459. What function displays row data in a column or column data in a row?
Transpose
460. This type of software contains rows and columns.
Spreadsheet
461. Software for organizing storage and retrieval of information is a(n)—
database program
462. To insert a word into the middle of a sentence-
Move the cursor to the desired location in the sentence and type the new word
463. A high-speed transmission line that carries WAN traffic is called a:
(1) X.25 line
(2) P2PN.
(3) Backbone
(4) POP
(5) None of these
464. A DVD is an example of a(n) –
Optical disc
465. Grouping and processing all of a firm's transactions at one time is called–
Batch processing
466. Semi-Conductor Memory is known as?
RAM
467. Every computer on the Internet is known as?
Host
468. A spiral shape track formatting is present in
Optical Disk
469. ---------- Types of virus that stays permanently in the RAM memory
Resident
470. Which of the following groups contains graphical file extensions?
JPG, GIF, BMP
471. A number system with a base of two is referred as–
Binary number system
472. Which of the following is not true for primary storage?
It is a part of the CPU
473. Which of the following is the advantage of Assembly language over Machine language?
(1) Easy to use
(2) Easy to understand
(3) Easy to modify
(4) All the above
474. VPN stands for-------
Virtual Private Network
475. Which of the following is true about Dial-up internet access?
It utilizes the existing telephone services
476. Which of the following memories can be read directly by the computer processor?
Main Memory
477. The communication between a processor and other devices inside the computer is done through?
Bus
478. Who is/are the founders of Microsoft?
Bill Gates and Allen Paul
479. What is the difference between a check box and Radio button?

In check boxes multiple options can be selected whereas in radio buttons only single option can be selected

480. If a memory chip is volatile, it will.....
lose its contents if current is turned off
481. Which is NOT a function of a microprocessor?
Keeps the system unit cool
482. To connect to a WAN, you must have:
POP
483. During the _____ operation, the control unit determines what the program is telling the computer to do.
decode
484. _____ has a large storage capacity, up to 17 GB if both layers and both sides are used.
DVD-ROM
485. A _____ card connects each computer to the wiring in the network.
network interface
486. What is the initial page of the Web site?
The home page
487. What is the term for a set of step-by-step instructions that direct a computer to perform its tasks?
program
488. To execute a given DOS program, you must type a(n) _____.
command
489. PC cards, flash memory cards, and smart cards are all examples of:
Solid state storage devices.
490. A _____ is a unique identification number generated by a computer hardware component or a program.
GUID
491. RAM is an example of volatile storage and serves as the computer's----------
Short-term memory
492. When a computer prints a report, this output is called____.
Hard copy
493. The ascending order of a data hierarchy is----------
Bit-byte-field-record-file-database
494. In computer terminology, information means-------
Data in more useful or intelligible form
495. A floppy disk contains----------
Both circular tracks and sectors
496. A plotter is---------
An output device to produce drawings and graphics
497. Which of the following is a graphical package?
CorelDraw
498. A mouse, trackball, and joystick are examples of _____."
pointing devices
499. The Internet uses----------
Packet switching
500. What would you use for immediate, real-time communication with a friend?
Instant Messaging
501. Which of the following is used to create newspaper style columns?
Format Columns
502. How much space in minimum must be provided between columns?
0"

CAREER POWER™
AN IIT/IIM ALUMNI COMPANY

503. Which operation you will perform if you need to move a block of text?
Cut and Paste
504. The electronic switches in the ENIAC were:
vacuum tubes
505. Help Menu is available at which button?
Start
506. A.....is the term used when a search engine returns a Web page that matches the search criteria.
Success
507. In Excel.....allows users to bring together copies of work-books that other user have worked on independently.
Merging
508. What kind of memory is static and non - volatile?
ROM
509. ---- Is the Virus that overwrites the files or a few parts being replaced?
File infectors
510. Which of the following is an advantage of stored programs?
Reliability
511. Which of the following is an Object Oriented Programming Language?
Java
512. MICR is exclusively used in----------
Banking Industry
513. Which of the following is an audio input device?
Microphone
514. Digital Camera is an?
Input Device
515. The internet service that provides a multimedia interface to available resources is called----------

World Wide Web

516. What is the short-cut key to display save -as dialog box in MS-Word?
F12
517. Which of the following is not a web browser?
(1) Mozilla (2) IE (3) CE (4) Opera (5) Safari
518. The backspace key is most often used to?
Delete a character to the left of the cursor
519. Which of the following keyboard shortcuts is used to view the properties of a selected object?
Alt + Enter
520. What is the function of a Drop Cap in MS - Word?
It lets you begin a paragraph with a large dropped Initial capital letter
521. Which of the following is a data - entry device?
(1) Barcode Reader (2) MICR (3) OMR (4) OCR
(5) All of the above
522. Which of the following is true about CPU?
It makes the information resulting from processing available for use
523. Adwords is an----------
Advertising Service by Google
524. Which of the following is the largest storage?
Terabyte
525. System Software includes which of the following?
(1) Linkers
(2) Debuggers
(3) Loaders
(4) Compilers
(5) All the above
526. Which of the following is / are the functions of operating system?
(1) Memory Management
(2) Access to I/O devices
(3) Controlled Access to files
(4) All the above
527. Which of the following is fastest?
Cache Memory
528. Each Web address is actually a series of numbers, which is usually called as---------
IP address
529. Which of the following is used to connect a personal computer to a network?
NIC
530. Which of the following is the short-cut key to close an active tab of a browser?
Ctrl + W
531. Which of the following is true about URL?
It is a global address of documents and other resources on World Wide Web
532. Which of the following keyboard short-cut is used to center the paragraph?
Ctrl + E
533. Which of the following functions is not performed by servers?
Word Processing
534. Which of the following is true about Secondary Storage?
Does not require constant power
535. Which of the following is the full form of LSI?
Large Scale Integration
536. Which of the following Computer languages is used for Artificial Intelligence?
PROLOG
537. Which of the following is the slowest Internet connection?
Dial-Up
538. What is the full form of USB?
Universal Serial Bus
539. 'FIND' option is available under which of the following menu?
Edit
540. Compilers and interpreters are themselves-----
Programs
