Answer any 3 out of the given 5 questions in 50– 80 words each (4 x 3 = 12 marks)					
Q. 17	A common way to transfer images is with heat using design transfer sheet or paper, found in almost any craft or sewing store in the market. A sheet of design, an iron and a pressing cloth is required for tracing the design. Designs can be traced directly if the design is printable on a transfer paper or sheet. To print the design on the fabric, place the fabric face down and tracing sheet on it then heat it with an iron for an appropriate time to transfer the design on the fabric. A transfer paper or sheet of printable design is available in the market with detailed instructions, including time period for heating, on how to transfer the design. The design will transfer to the fabric or garment perhaps in a few seconds.	Textbook, class IX	Unit-1 Basics of Hand Embroidery	21	4
Q. 18	<p>(a) Thread tails</p> <p>Trim off the thread remains as near to the article as possible, and take care not to cut any locked knots (if made).</p> <p>b. Missing stitches- The simplest way for this is to thread a hand-sewing needle with a double strand of embroidery thread matching the base fabric and do a hand satin stitch to fill in the areas, in which the stitches are missing.</p> <p>c. Thread loops- If one observes thread loops in the same direction as of the stitches, they should not be trimmed. Instead, the embroiderer can use fingernails to pull the loops to the wrong side or backside of the garment. However, if thread loops are in an opposite direction of the stitches, it is safe to trim them. They should be trimmed as closely to the stitches as possible.</p> <p>d. Stains on Embroidered product- Most of the stains can be removed with a drop of dish soap and water. If this does</p>	Textbook, class IX	Unit-3 Embroidery Defects and Finishing	73	4
